

ONE TRADE

ONE SOLUTION

The range of VOKKERO® products.

Key features :

- **Hands-free:** for instant communication.
- **Patented noise filter:** an optimal listening quality even in loud surroundings.
- **Multi-channel:** several systems can be used at the same site.
- **Encrypted digital transmission:** to prevent eavesdropping and ensure confidentiality.
- **Small, light, strong, discreet.**

VOK-SAFE

Wireless communication systems for rescue services

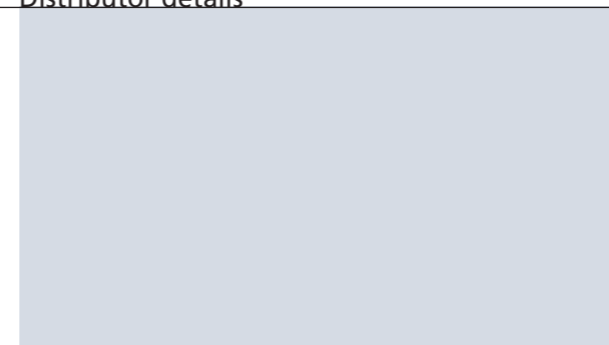

TECHNICAL DETAILS

Number of users	2 to 6 + an unlimited number of «listen-only» receivers
Weight and dimensions	150g (including battery) 120 x 60 x 25mm
T° range	-10/+50°C (14/122°F)
Battery life	Up to 14 hours (2000mAh version)
Battery	Rechargeable Li-Polymer 3.7V 1000 or 2000mAh
Frequencies	863-870MHz (Europe, South Africa ...) 915-928 MHz (USA, Canada, Australia...)
Output power	10/200mW
Range	Up to 800m
Channels	3
Modulation	GFSK
Sensitivity	-103dBm (BER 10 ⁻³ under 50Ω)
Technology	TDMA
Norms	Europe: EN 300-220 / EN 301-357 USA: FCC Part 15 AS/NZS 4268

A SOLUTION FOR EVERY TRADE

WIRELESS AUDIO CONFERENCE SYSTEM

► The VOKKERO range of products is specially adapted for use in rescue services.

► VOK-SAFE is an **all-in-one, hands-free communication system** that enables mobile teams to manage a totally private communications network.

Using VOK-SAFE, 2 to 6 people can communicate in **full duplex mode** (speaking instantaneously, not alternating). An evolutionary system, it enables an **infinite number of users to join the closed network in «listen only» mode**. It also offers the possibility of defining groups in order to allow **several teams to co-exist** on the same site without any interference between them.

The **encrypted digital transmission** guarantees maximum protection against interference during communications and respects the private nature of exchanges. Thanks to VOK-SAFE, specialist teams needing to react quickly and move freely need only turn the system on without having to worry about limits imposed by base stations. Operating on license-free frequencies enables **instantaneous use regardless of the location**. It is easy to operate, efficient and reliable.

Small, light and strong, Vokkero® is fitted with a **patented high-performance noise filter** that guarantees optimal listening quality in even the noisiest of environments.

Developed initially for refereeing, this system was designed to be adaptable to a wide range of conditions, such as those encountered in the **security, industrial, shipping, sports, construction, catering or events industries**.

ONE SOLUTION

► Specific obligations for professional rescue teams (rapid intervention, dialogue, teamwork, on-site risk assessment) mean that they need to work in total safety. **Clear, intelligible communication significantly reduces the risks linked to faulty understanding.**

VOK-SAFE enables **instant communication** with a range of up to 800m. This system is particularly well suited for emergency situations since it does **not require permanent installation** or access to a terminal.

The **hands-free operation** enables users to concentrate fully on their job (fire-fighting, intervention at height, rescues, handling hazardous materials, etc.) whilst remaining in **constant contact with team members**.

Having already proved a success with several American and European fire brigades, this portable top-of-the-range radio gives all mobile teams **freedom of movement for fast and effective intervention**.

CUSTOMIZATION

► VOK-SAFE systems are available in kit form for 2 to 6 users.

In addition to our packaged systems, we can also adapt a system to your specific needs with these accessories by request:

Other Headsets

Chargers, batteries & Push-to-talk
